

## 2024 International Methodology Symposium

Statistics Canada

October 29 to November 1, 2024

Statistics Canada Complex

Ottawa, Ontario, Canada

### Shaping the future of official statistics

### Call for Contributed Papers

Statistics Canada is pleased to announce that its 2024 International Methodology Symposium will take place in Ottawa at the offices of Statistics Canada from **October 29 to November 1, 2024**, including workshops on the first day. This year's title is "**Shaping the future of official statistics**".

We invite contributed papers that examine **methodological challenges related to the production of official statistics in a modern era**. Topics may include the following:

- Record linkage and statistical matching
- Data integration
- Administrative and alternative data sources
- Big Data
- Sampling frames and sample design
- Collection
- Edit and imputation
- Measurement errors and estimation
- Small area estimation
- Data analysis
- Non-probability samples
- Data quality
- Disclosure control
- Artificial intelligence and machine learning

Please submit your proposal [here](#) by **May 3, 2024!** It must include the following: a title, an abstract of approximately 250 words (in English or French), the topic(s) you are targeting, three to six keywords and your full contact information.

You will be informed whether or not your proposal is accepted by **May 24, 2024**. For all accepted proposals, the presentation (in English or French) is due by **September 6, 2024**. Conference proceedings will be published online. A final paper must be submitted by **January 10, 2025** for inclusion in the proceedings.

Please visit the website below periodically as further information will be provided on an ongoing basis:
